

For more than 10 years 3Q has developed and operated a robust and high-performance SaaS platform for video management and streaming.

We are specialists in streaming technologies and high availability. Using our in-house platform, we broadcast live and on demand content for leading content providers worldwide. With full GDPR compliance, innovative features, multiple system integrations, an intuitive UI and customer support based in Berlin, we are a trusted partner for our customers.

To support our strategy of sustainable growth, we are searching for

## QA Engineer (fulltime)

### What we want to achieve with you

- Development and implementation of manual and automated tests
- Comparison of implemented features to design and ACs
- Management and development of our testing tools
- Close collaboration with the designer, product owner, and developers to continually improve the quality of our software

### What you offer

- a completed computer science degree or equivalent experience
- experience in quality assurance / software testing and or software development
- a high level of interest in complex software solutions and the ability to identify weaknesses, dependencies, and risks
- experience with setting up and implementing automated and manual tests
- the ability to view software from the customer's perspective
- experience with video management or delivery is a plus
- familiarity with PHP, Javascript and CSS is a plus
- the ability to communicate in German or genuine motivation to learn the German language

### What we offer

- a young and highly motivated team
- the space to introduce and implement your own ideas
- flexible working times
- friendly working conditions (e.g. free coffee and other drinks in the office, flexible home office policy, and much more)
- Offices in Berlin & Munich
