

For more than 10 years 3Q has developed and operated a robust and high-performance SaaS platform for video management and streaming.

We are specialists in streaming technologies and high availability. Using our in-house platform, we broadcast live and on demand content for leading content providers worldwide. With full GDPR compliance, innovative features, multiple system integrations, an intuitive UI and customer support based in Berlin, we are a trusted partner for our customers.

To support our strategy of sustainable growth, we are searching for

System Engineer (m/f/x) – Fulltime

What we want to achieve with you

A sustainable and scalable infrastructure for our video management and Streaming Platform

Your Tasks

- Expand and maintain our server infrastructure
- Build out and maintain our CDN
- Provide tools and systems for development

What you offer

- A degree in computer science or a comparable education with several years of professional experience
- A high ability to work in a team and strong communication skills
- You can set up and configure Linux servers (especially Ubuntu and Debian)
- Experience with administration and configuration of Nginx / Apache2
- Experience in dealing with virtualization v.a. Docker, containerd, Kubernetes. Virtualbox is desirable
- Experience with system monitoring, especially Kibana
- Experience with modern storage systems like Ceph
- Experience with administration and configuration of ProxySQL, HA-MySQL
- Experience with configuration and maintenance of server hardware is desirable
- German fluent in written and spoken, English business fluent

What we offer

- a young and highly motivated team
- the space to introduce and implement your own ideas
- flexible working times
- friendly working conditions (e.g. free coffee and other drinks in the office, flexible home office policy, and much more)
- Offices in Berlin & Munich
